Professional Headshot

A hyper-realistic, high-fidelity professional headshot of the white male subject (late 20s) from the attached reference, strictly maintaining exact facial likeness and identity. The subject is framed in a classic head-and-shoulders portrait against a solid, matte dark charcoal seamless studio background. He is wearing a sharp, dark navy blazer over a simple black t-shirt or turtleneck, projecting a modern clean aesthetic. The lighting is a professional high-contrast studio setup, utilizing a large softbox key light at a 45-degree angle to sculpt the facial features with controlled shadows (Rembrandt style), completely void of natural daylight. A subtle cool-toned rim light separates the subject from the dark background. Shot on a Phase One XF IQ4 with an 85mm f/1.4 portrait lens, capturing razor-sharp focus on the eyes, realistic skin texture, and the fine weave of the fabric in 8k resolution.
